

## Validation Certificate

Awarded to: **IcFEM Dreamland Mission**  
Date: **14 December 2023**  
Project: **Community-based Tree Growing Project (Phase 1)**  
Location: **Around Kimilili, Western Kenya**

The award of this Seal of Approval is based on:

- Data provided by IcFEM for the planting and management of 15,151 trees through Local Transformation Units around Kimilili, Western Kenya
- An agreed project design that includes details of planting, management and monitoring, budget, work plan, risk analysis and carbon sequestration estimates over 15 years
- Funding over 15 years with monitoring at prescribed intervals

It is estimated that the trees will sequester a total of:	<b>16,668 tCO<sub>2</sub>e<sup>†</sup></b>
This is made up of saleable stocks of carbon of 11,142 tCO <sub>2</sub> e and a buffer of 5,526 tCO <sub>2</sub> e.	
Over an anticipated project lifespan of:	<b>15 years</b>

**Caroline Pomeroy**  
Director of Climate Stewards

† This ex-ante emissions calculation will be verified as monitoring is carried out on an annual basis. The additional buffer amount may be available to purchase ex-post at the end of the project period, depending on monitoring results.
